CORE SKILLS

Native iOS

- Swift & SwiftUI
- Combine, Async/Await Concurrency
- MVVM & Clean Architecture
- CoreData, SwiftData, Biometric APIs

Cross-Platform

- Flutter & Dart
- Riverpod & Provider State Mgmt
- Dependency Injection

Leadership & Impact

- Technical Mentorship
- Cross-Functional Alignment
- Code Review Direction

LANGUAGES

Khmer

English

Ly Houleng

SENIOR MOBILE APP DEVELOPER

Senior Mobile Developer with extensive experience building high-quality iOS and cross-platform applications using Swift, SwiftUI, and Flutter. Skilled in mobile architecture, API integration, performance optimization. Proven ability to deliver scalable solutions and collaborate effectively with cross-functional teams.

EXPERIENCE

June 2026 — Present

Chip Mong Commercial Bank

Senior iOS Developer

Develop and maintain secure, high-performance iOS banking applications using SwiftUI, delivering seamless and reliable user experiences. Implement new features, optimize application performance, enhance API integrations, and collaborate with cross-functional teams to deliver scalable digital banking solutions.

Jan 2025 — June 2026

Asia Pacific Development Bank

Mobile Developer

Maintained and enhanced the bank's Flutter mobile application, delivering secure, high-performance experiences across iOS and Android. Implemented new features, optimized API integrations, and resolved issues while collaborating with backend teams. Developed native iOS solutions using SwiftUI for platform-specific functionality.

June 2023 — Dec 2024

Asia Pacific Development Bank

Web Developer

Developed secure, high-performance banking web applications using Vue 3, TypeScript, and RESTful APIs. Contributed to Electron-based desktop applications and supported cross-functional projects with React, Express.js, and NestJS. Collaborated with product and QA teams to deliver scalable, seamless user experiences.

EDUCATION

2022 — 2025

Royal University of Phnom Penh

Bachelor of Computer Science

Built a strong foundation in data structures, programming patterns, and problem-solving through hands-on software development and web technologies. Developed practical understanding of database systems, software engineering principles, and project management. Strengthened these concepts through coding challenges and collaborative development projects.
