

Ly Horleng

Mobile App Developer

Hi, I'm a Web & Mobile Developer with a strong focus on creating seamless, user-centered digital experiences. Experienced in delivering reliable and scalable applications across web and mobile platforms, with a proven ability to maintain and enhance existing systems as well as develop new features that meet business goals. Dedicated to writing clean, maintainable code, solving complex problems, and collaborating closely with teams to deliver high-quality products on time. Committed to continuous learning and adapting to emerging technologies to drive innovation.

English

Experience

2023 - 2025

Asia Pacific Development Bank

Web Developer

I worked as a Web Developer responsible for designing and developing secure, high-performance banking web applications. I primarily built features using Vue 3 with TypeScript, integrating RESTful APIs to deliver dynamic, data-driven functionality for both internal and customer-facing platforms. I also contributed to desktop application development using Electron, enhancing the bank's operational tools. In addition, I leveraged my experience with React, Express.js, and NestJS to support cross-functional projects and optimize backend services when needed. My role involved close collaboration with product managers and QA teams to ensure smooth deployment, scalable architecture, and an excellent user experience across all platforms.

2025 - Present

Asia Pacific Development Bank

Mobile Developer

I focus on maintaining and enhancing the bank's mobile application built with Flutter, ensuring optimal performance, security, and a seamless user experience across both iOS and Android platforms. I troubleshoot and resolve issues, implement new features based on customer feedback, and collaborate with backend teams to improve API integrations. In addition to Flutter, I have the capability to develop native iOS applications using SwiftUI, enabling the delivery of platform-specific solutions when required. My work emphasizes clean, maintainable code, intuitive design, and consistent app performance to meet the bank's evolving digital needs.

Education

2022 - 2025

Royal University Of Phnom Penh

Bachelor of Computer Science

Studied at Royal University of Phnom Penh (RUPP) with a strong focus on software development, data structures, and web technologies. Gained hands-on experience in web development (HTML, CSS, JavaScript, React.js, PHP) and developed a solid foundation in database systems such as MySQL and SQL Server. Explored software engineering principles and project management practices to design and deliver efficient software solutions. Actively participated in coding challenges and collaborative projects, enhancing problem-solving abilities, teamwork, and real-world application of technical skills.
